

Radio-remote system

V-series

Save time and energy with the V-series radio-remote system.

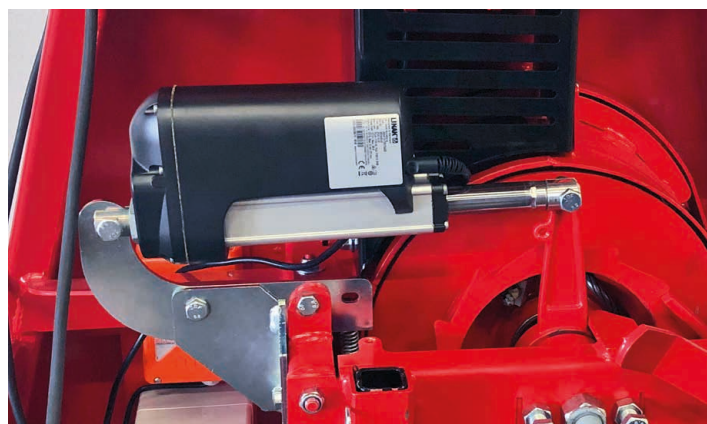

Your time is very valuable when doing your forestry job efficiently and with less effort. This is a priority for Fransgård and their continuous effort in the development and improvement of new machines and accessories to make your workdays more efficient and easier. With a radio-remote winch you save lots of walking and time, making you more productive.

Our radio remote system with an electric actuator kit, can be purchased separately, and easily installed on your existing Fransgård winch. The radio-remote system can be installed on both the existing models of winches, as well as the new V series. (V-4000, V-5000, V-6500, V-4021, V-5021 and V-6521).

Remote operation saves time

Large selection of other machines

Simple and safe operation at a distance.

With the handheld remote you operate your winch at a safe distance, without going back and forth to your tractor to haul your load. Our sturdy handheld remote can operate within 75 m/245 ft. from the radio receiver on the tractor winch. The remote is very easy and safe to operate. You need to continuously press the button on the remote, to pull the load, if you trip or fall or any other unexpected incident, the pulling operation will cease as soon as the button is released on the handheld remote. Furthermore, a backup battery on the receiver, will assure operation if the tractor power source, is suddenly interrupted.

Easy and comfortable remote.

Radio-Remotes are often very expensive, and require a complicated setup on the winches, but the Fransgård system is an effective system which is easy to install and operate, saving you time and physical energy, avoiding the strenuous and time-consuming walk back and forth to the tractor to complete your pulling operation.

Complete kit with instruction manual for installation.

You will receive a complete kit for installing the remote system on you winch. This kit includes: Manual for operation, radio receiver installation, Actuator unit, handheld radio- remote as well as with bolts, nuts, shims/ spacers and brackets (Important: Critical that the included step-by-step instructions, be performed accordingly).

Large electric spindle with safety.

The remote activates the large electric spindle in the actuator, which has a two safety fuses. It has also a battery back-up, generating enough power to activate the actuator, if it becomes necessarily. (Notice: Always make sure the back-up battery is fully charged and ready to operate – as indicated in the manual)

NOTICE:

The locking device on the winch cannot be operated from the handheld remote, it must be operated manually. If you want the locking device to be operated with the remote, you must consider other more expensive winch models.

Made in Denmark

A strong combination of our own modern production facilities and excellent craftsmanship ensure that our products meet the high demands of customers for durable and robust machines. With all our production on-site, we maintain a constant overview of every single order so that the customers receive the right article on time.

It's Danish efficiency and quality at its best.
